AI competence and role sample

Fictional case data and worked reasoning

KI08 · Eight participants correspond to 100 percent. Seven completed roll samples correspond to 87.5%. The replacement path remains open in one roll.

Test point Purpose or comparison Observation Decision		
Service 4 people perform the role demonstrably	4 participations and 4 passed samples.	Seen as a target transaction.
Release Roll Exhibit and trigger replacement	4 participations and 3 passed samples.	A person remains accompanied until the repetition.
Repeat re-sample failure of main contact	The same condition is observed for replacement routes.	Findings can be concluded after technical assessment.

Expected result

A clear decision as to which tasks a person or role can perform after the observed sample.

Determine expected action and authorised role

Documenting participation and observed action separately

Check repeat under the same critical condition

AI competence and role sample

For your observation, specify a findable document.

Plan exercises according to role. Calculate documented participation and passed roll samples separately and track gaps until repetition.

Verification identification, legal entity and date of processing and responsible body

Role and permitted intervention

Targets and exercise assignment

Participation and passing samples

Open task observation

Support and representation rule

AI competence and role sample

Refer remedial and post-test to the original test order.

Findings and supporting evidence

After-test date and observed replacement route

Tested follow-up test with date, observation and version documentation

Release and responsible body

Release by and on the open order and date
